OVERVIEW

PRODUCT

High-end residential complex at the seafront of Palma. Displaying ad istinctive architecture style graciously integrated within the traditional Jonquet neighborhood in Palma's old town.

LAYOUTS

One, two, and three bedroom apartments organized in different typologies such as, horizontal double façade orientation, duplex, penthouses and three-story across ground floor units with multi-possibility basements and private parkings.

All 4 blocks integrate generous and very bright living areas with fine-quality finishes, large private terraces, gardens, and rooftops.

All building blocks are connected by gardens and pathwalks on the ground floor.

All linked to the communal facilities.

FAÇADES

The façades portray Mallorcan style. Contemporary facade the architectural elements are integrated gracefully, in-line with the traditional styles and outstanding to the eye.

Traditional local elements such as Mallorca wooden shutters, wooden windows, Arabic roof tiles, wooden slope roofs, earthy covering colours, ceramic lattice and covered terraces.

Contemporary elements such as aluminium, pop-up framed balconies, spatial variability openings, customized lattice.

GARAGE / PARKING

Connected to facility areas, technical areas, storage rooms and apartments.

Exposed concrete walls, epoxi painting and LED lighting.

CONSTRUCTIVE TYPOLOGY

Reinforced concrete structure, screen walls, pillars and waffle slabs.

CHARACTERISTICS

Perimeter screens of reinforced concrete (deep foundation) and reinforced concrete foundation slab with designation for environments with high humidity and / or in contact with seawater.

Multilayer sheet, flexible and adherent (HDPE) waterproofing system.

The structure is solved with concrete pillars on all floors for the vertical structural elements, except in the vertical communications cores that will be through screens. And waffle slabs and solid concrete slabs for the horizontal structural elements.

Features: Two types of interior finishes: LA BRISA & EL MONTE
